Fund Objective

A medium risk fund aimed at providing some protection against sudden volatility, however, with a flavour of equity built in to provide upside potential. This should be considered a 3 – 5 year term portfolio.

Note that as this is a GLOBAL fund, we will, from time to time, hold SA assets if this is appropriate.

Cumulative Returns

Commentary

The fund returned 3,28% for the first quarter of 2021. This was mainly off the back of continued bull markets in global shares and global property. It seems COVID vaccine related news is still driving markets, along with US stimulus plans and low interest rates. Emerging market holdings were slightly more subdued but still returned positive figures. Global bond holdings were flat for the quarter and the fund's cash holdings proved fruitful too.
