

Fund Objective

A medium risk fund aimed at providing some protection against sudden volatility, however, with a flavour of equity built in to provide upside potential. This should be considered a 3 – 5 year term portfolio.

Note that as this is a GLOBAL fund, we will, from time to time, hold SA assets if this is appropriate.

Commentary

The fund lost -5,55% in Q3. Continuous rate hikes and high inflation globally, as well as the ongoing Russia/Ukraine war, continued to prevent any recovery in the markets. Global emerging markets and developed equities continued to fall. Global property and global bonds also continued to decline. New cash inflows were deployed into underweight holdings, taking advantage of lower entry points, as well as purchasing SA Govi bonds to lock in the high yields available.
