

Fund Objective

The primary investment objective of the fund is to seek a high level of income with capital growth over the long term.

Risk Profile*

Low	Low - Medium	Medium	Medium - High	High
-----	--------------	--------	---------------	------

**Funds in this category are tilted towards a higher money market, cash or short dated fixed income exposure. While statistical analyses of markets' returns indicate that investments in money market instruments has a high degree of implicit capital protection, it also comes with a risk of delivering returns below the inflation level over a period of time. These funds are suited to an investor with a short term investment horizon (1-5 years) or investors who have a specific short-term goal and cannot afford high market fluctuations.*

Risk Statistics

	Portfolio	Benchmark
Std Deviation	3.74%	4.44%
Max Drawdown	-9.72%	-8.12%
Sharpe Ratio (arith)	0.50%	0.38%
Max 1 Month Return	4.20%	5.57%
Min 1 Month Return	-7.26%	-6.27%

General Fund Information

Classification	(ASISA) South African MA Low Equity		
Benchmark	South African MA Low Equity Average		
Fund Inception Date	2006/05/15		
Domicile	South Africa		
Base Currency	Rand		
JSE Code	PCPC		
ISIN Number	ZAE000078424		
Minimum Initial Investment	R 50 000 lump sum (R 1000 thereafter)		
NAV Price (Month-End)	R 1.38		
Income Distribution Frequency	Semi-Annually		
Re-Investment Dates	3rd working day - March and Sept		
Regulation 28 Compliant	Yes		
Issue Date	2026/04/29		

Income Distributions

Distribution Date	2024-09	2025-03	2025-09	2026-03
Distributions (Incl. interest)	R 0.048	R 0.050	R 0.047	R 0.045

Fund Universe

The fund will, apart from assets in liquid form, consist solely of participatory interests in Collective Investment Schemes.

The following asset allocation limitations will apply to the fund:

Equity Funds:	0% to 10%
Property Funds:	0% to 25%
Money Market Funds:	65% to 100%
Fixed Interest Funds:	65% to 100%

The manager will be permitted to invest on behalf of the fund in offshore investments as legislation permits.

Commentary

The fund lost -0.73% for the quarter. January and February were stellar months, and then Trump declared war on Iran, and everything fell in a heap. The longer-term returns are still intact, but the quarterly gains got wiped out. Oil prices soared, inflation started to rise and investors flocked to the safety of the US Dollar. Equity and bond markets alike took strain.

Fee Structure*

Total Expense Ratio (TER)	0.78%
Transaction Costs (TC)	0.14%
Total Investment Charges (TIC)**	0.92%
Performance Fee	Nil
Advisory Fee	Nil
Initial Fee	Nil

**Period (annualised). **The TIC is inclusive of Administration and Fund Management Fees (excl. VAT).*

Brantam Asset Management Class Fee Structure*

Class A:	0.85%	Class R:	0.75%
Class A1:	0.50%	Class R1:	0.50%
Class B:	0.75%		

**Fees are excluding VAT.*

Net Asset Values

Date	2026-01	2026-02	2026-03
Fund NAV*	144,290,350	146,717,423	140,189,004

**Fund size/NAV as at relevant month-end date.*

Growth of a R 100 000 investment*

Time Period: 2006/05/16 to 2026/03/31

— Prime Classic Port Conservative FoF C — (ASISA) South African MA Low Equity

*Performance History: Based on an initial investment of R 100 000.

Asset Allocation

Portfolio Date: 2026/03/31

Glossary of Terms

Total Investment Charge (TIC) is the sum of the Total Expense Ratio (TER) and the Transaction Costs (TC).

Total Expense Ratio (TER) is the global standard used to measure the impact that the deduction of management and operating costs has on a fund's value. It gives you an indication of the effects these costs have on the future growth of your investment portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Also, the current TER may not necessarily be an accurate indication of future TERs.

Transaction Costs (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available.

Std Deviation (Standard Deviation) is a statistical measure of the dispersion of returns for a given security or market index.

Max Drawdown is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained. Max drawdown is an indicator of downside risk over a specified time period.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk.

Important Disclosures

This is a minimum disclosure document and a general investor report. Collective Investment Schemes are generally medium to long term investments. The value of the participatory interests may go down as well as up. The manager does not provide any guarantee either concerning the capital or the return of a portfolio. Past performance is not necessarily an indication of future performance. CISs' are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to other charges. The fund is registered under the Prime Collective Investment Scheme, managed by Prime Collective Investment Schemes Management Company (RF) (Pty) Ltd ("the manager") (Registration No. 2005/017098/07), a registered Collective Investment Schemes Management Company in terms of the Collective Investment Schemes Control Act 45 of 2002, supervised by the Financial Sector Conduct Authority ('FSCA'). Brantam Financial Services Holdings (Pty) Ltd is the FSCA approved and appointed investment manager of the fund, situated at 12 Montrose Avenue, Craighall Park and authorised as a Financial Services Provider (License No. 544). The manager takes full responsibility for the co-named portfolio, regardless of any co-naming arrangements.

A schedule of charges and maximum commissions is available on request from the manager. According to their mandates, the manager has a right to close portfolios to new investors to manage them more efficiently. Commission and incentives may be paid and, if so, will be included in the overall costs. Forward pricing is used. The manager may borrow up to 10% of the portfolio's market value to bridge insufficient liquidity. Income is reinvested on the reinvestment date. The Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Dealing prices are calculated on a net asset value, and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance is calculated for the portfolio. The individual investor performance may differ due to initial fees, the actual investment date, the date of reinvestment, and dividend withholding tax. Income distributions are included in performance calculations before deduction of applicable taxes. Fund of funds invests in funds of collective investment schemes that levy their charges, resulting in a higher fee structure for the Fund of Funds. Performance numbers and graphs are sourced from Morningstar. NAV to NAV figures have been used.

Investment performance is for illustrative purposes only. Investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the exact amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual date of reinvestment.

The risk profile of the Fund ranges from low risk to high risk, with a low risk potentially associated with lower rewards and high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. Certain investments, including futures, options, equity swaps, and other derivatives, may give rise to substantial risk and might not be suitable for all investors. The daily cut off time is 14:00 for trades, and the valuation point 17:00 daily. Prices are published on Finswitch by 10:00 daily. One can also obtain additional information on Prime Investments products on the Prime Investments website, and all price related queries or information is readily available on request. Prime Collective Investment Schemes Management (RF) (Pty) Ltd is a registered Collective Investment Scheme Manager in terms of Section 5 of the Collective Investment Schemes Control Act and is a wholly owned subsidiary of Prime Financial Services (Pty) Ltd a member of ASISA.
