Prime Shiraz Prudential Aggressive Fund of Funds (Class C)

30 September 2024

Fund Objective

The primary investment objective of the fund is to achieve superior capital growth over the longer term at the risk of greater short term volatility of capital values.

Risk Profile*

Low	Low - Medium	Medium	Medium - High	High

**Funds in this category are tilted towards a high level of capital growth assets (equities) with reduced allocation to income generating assets (bonds). Due to the higher allocation to equities within these funds, the investment returns generated will be mostly of a capital nature. Statistical analyses of markets' returns indicate that investments in these funds have a high probability of producing inflation-beating returns over a medium to long-term investment horizon (5-10 years plus).*

Fund Universe

The fund will, apart from assets in liquid form, consist solely of participatory interests in Collective Investment Schemes.

The following asset allocation limitations will apply to the fund:

Equity Funds:	61% to 75%
Property Funds:	0% to 25%
Money Market Funds:	0% to 34%
Fixed Interest Funds:	0% to 34%

The investment manager will be permitted to invest on behalf of the fund in offshore investments as legislation permits.

The fund will conform to regulations governing retirement portfolio investments and, as such, is a suitable vehicle for retirement portfolios.

Commentary

The fund gained an impressive 9.23% (after fees) for the quarter. Local listed property was the front runner, with local large and midcap equity close behind. The smaller fixed income exposure added to the positive returns. The offshore exposure was the only detractor, due to continued strengthening of the Rand over the quarter.

Glossary of Terms

Total Investment Charge (TIC) is the sum of the Total Expense Ratio (TER) and the Transaction Costs (TC).

Total Expense Ratio (TER) is the global standard used to measure the impact that the deduction of management and operating costs has on a fund's value. It gives you an indication of the effects these costs have on the future growth of your investment portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Also, the current TER may not necessarily be an accurate indication of future TERs.

Transaction Costs (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available.

Std Deviation (Standard Deviation) is a statical measure of the dispersion of returns for a given security or market index.

Max Drawdown is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained. Max drawdown is an indicator of downside risk over a specified time period.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk.

Important Disclosures

The fund is registered under the Prime Collective Investment Scheme, managed by Prime Collective Investment Schemes Management Company (RF) (Pty) Ltd ("the manager") (Registration No. 2005/017098/07), a registered Collective Investment Schemes Management Company in terms of the Collective Investment Schemes Control Act 45 of 2002, supervised by the Financial Sector Conduct Authority ('FSCA'). Brantam Financial Services Holdings (Pty) Ltd is the FSCA approved and appointed investment manager of the fund, situated at 12 Montrose Avenue, Craighall Park and authorised as a Financial Services Provider (License No. 544).

Collective Investment Schemes ("CIS") in securities are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up and past performance is not necessarily a guide to future performance. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio. All CIS are traded at ruling prices and can engage in borrowing and scrip lending. The manager reserves the right to close and reopen the portfolio to new investors from time to time in order to manage them more efficiently and in accordance with its mandate.

A schedule of fees and charges and maximum commissions is available on request from the manager. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Investment performance is calculated for the portfolio and is for illustrative purposes only. The investment performance may differ for each investor as it is calculated by taking into account the initial fees, the actual investment date, the date of reinvestment of income and dividend withholding tax and all ongoing fees. Dealing prices are calculated on a net asset value and auditor's fees, bank charges and trustee fees are levied against the portfolios. Lump sum investment performances are quoted. Income distributions are in the calculations. The reinvestment of income is calculated on the actual amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. Performance numbers and graphs are sourced from Morningstar. NAV to NAV figures have been used. A fund of funds is a portfolio that invests in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds.

Risk profile of the fund ranges from low risk to high risk with a low risk potentially associated with lower rewards and a high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. The daily cut off time is 14:00 for trades and the valuation point is 22:00. Prices are published on Finswitch by 10:00 daily and are also available on request from the manager.

This is a Minimum Disclosure Document and a general investor report and should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice. Investors can also obtain additional information on the managers' website and all price related queries or information is readily available on request.
